Rekha Pitchumani received the Ph.D. degree in computer science from the University of California, Santa Cruz in Santa Cruz, CA, USA. She is currently a Research Manager at the Memory Solutions Laboratory, Systems Technology Group, San Jose, CA, USA. Her work at Samsung focuses on the systems design and device architecture of next-generation memory and NAND flash SSDs, such as CXL memory, key-value SSDs, and computational storage. Her work prior to Samsung was on key-value data management for shingled magnetic recording disks.
